About 75 cm west from
west end of foot path of
new approach bank
There are eleven rows on south
side of tiles. To the east of 75
cm line, they become ~~B~~ A
Rough in all probability ~~they~~
the eleven continued to the
bed rock. ~~C~~ ~~About~~ At about
35 cm from west ~~of~~ side
of west end of tiles, there
were originally only ten on
south side.
~~On the north side there~~
On the south side at west end,
there ~~were~~ was one less
~~tile~~ row of tiles going
E and W on north side away
from bed rock. ~~On~~
On north side of tiles, there
originally at west end ~~about~~
seven and from a point about
85 cm. east of west end of
tiles on north side, there
were eight, ~~of these~~ a
and to the east of this
point at least two more
additional rows on north side

151

date 14 July 1949

On the south side, about 90 cm west of ~~inward~~ edge of ~~upstand~~ foot bath of upstand bath there are 13 rows. On the north side about 90 cm from same edge of foot bath, there are two ~~rows~~ additional rows ~~going~~ to south edge. About 78 cm East of 90 cm point there are three additional tiles on each side, leaving room in the center for ~~the tiles~~ one width of tile going N.S. ~~and~~

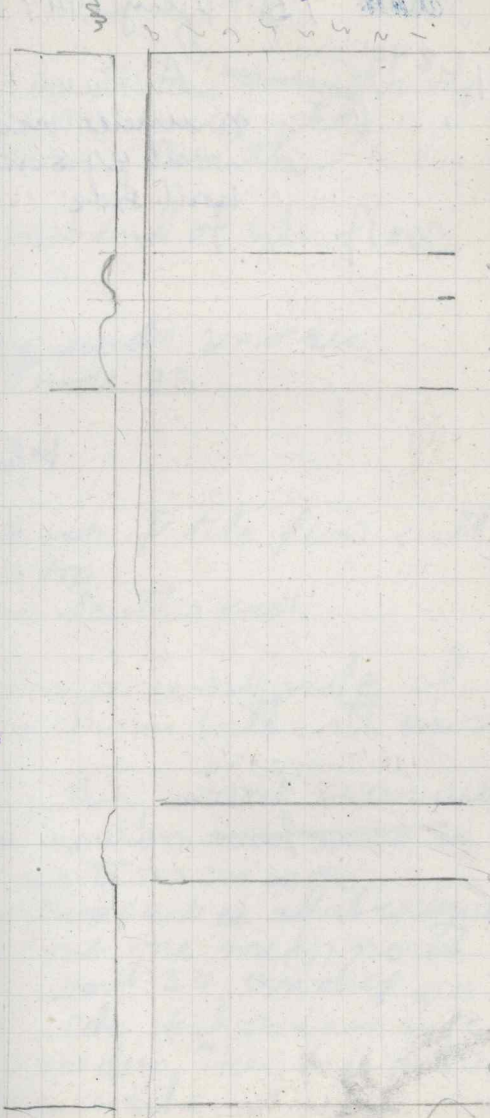

rough sketch of above.

Cross section of Room B

P 105

East of drain from ~~bath~~ with mosaic floor second layer which lay directly above bedrock.
Between two drains clearing second layer, the top of this about 10 cm thick was hard and a different soil but it was so slight that it should be considered as all part of the second layer.

South cistern repaired stone in NW corner not original. In addition several other stones have been replaced below particularly on south side.

In east part of Room B the second layer which began under the earth under the foundations of the mosaics virtually the same untrodden rock is reached. It is loose with stones and many fragments of mosaic. However ~~only~~ only 50 cm south of north wall and 50 cm

~~to 25 cm~~

date 16 July 1949

west of west wall, soil becomes hard packed. This top of this hardening occurs on north side about level with top of stones. On west side it is in lower. There is also a third layer with plaster on the north side, extending south ~~to 20~~ 120 cm.
