Fragment of Gray Marble

Max dim 0.102 Th c. 0.017

Broken all around

Two long sides roughly chords of circle .28 in diameter. Under surface smoother than face, and has traces of cement and a shallow groove. Face preserves segments of circumference of double circle. Several oblique lines branching from these may be veins of a leaf.

Curium, Palace
West of Room O, in passage leading into wall blocking off cellar.
23 Oct 1948
Small find no.
Fales NB no, p.

A 409

Fragment of White Marble

PL 0.137 PW 0.08 Th 0.02

Broken on two adjoining sides of rectangle. A corner piece.

Outer edges beveled in back for setting into mortar, some of which still adheres. Front, smoothly finished, preserves sections of two marginal grooves set in 0.035 and 0.055 from edges respectively. Workmanship of grooves is careless, since they run past point where they meet other marginal grooves at right angles.

Curium, Palace

A 410

Sandstone Fragment: Acanthus Leaf

PH 0.075 PL 0.165 PW 0.15

A corner piece, presumably meant to be seen from below. Broken to right and in back.

Top preserves finely tooled relieving surface front and left. Front and left side, a rectangular echinos-like member about 0.035 high. Below, a well-preserved acanthus leaf adapted to its corner position with rectangular central rib ending in bud-like structure. Parts of palmately compound leaf separated by drilled indentations. Bit of crowning moulding below preserves quarter-round and two small

A 420

Sandstone Mutule Fragment

PH 0.03 PW 0.09 Th 0.06

Part of Cyprian mutule, underside and one side preserved.

Mutule 0.025 deep is surmounted by rectangle 0.09 deep and 0.08 high, the latter surmounted by ovolo. On the underside of mutule are lines engraved, converging on preserved corner. Problem here is why is the mutule cut in half.

A 422

Sandstone Fragment

PH 0.106 PW 0.155 Th 0.058

Broken two sides, bottom, and back

Face preserves, above, a trace of moulding with shallow groove between torus and ovolo and to right a semi-circular projection forward. Near bottom of projection is a hole 0.04 wide and drilled in 0.01 deep. Beneath the hole is a vertical line incised, about 0.015 long. Below are traces of a volute in shallow relief and a ridge following curve of left edge.
