GL 63

Bowl

1:8

v. 6 35.25

Thin blown glass with an adhesive iridescence unlike that of the glass bottles; mainly white in color; both inside and out were painted; the interior was painted in blue, black, yellow, white, and green. Concentric circles of spiral patterns seem to have covered the interior on a field of white with some painting between that cannot be made out. Only traces of the painting of the exterior have survived

Broken; mended in part; incomplete.
