bronze strigil

Film Vg 14

1:10

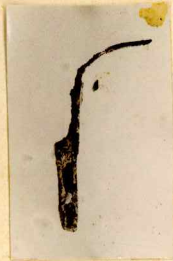

Film Vg 15

1:4

The scraper welded(?) along its back to an extension of the handle. The handle, like the scraper, made of sheet bronze. The handle strip has been folded out, up, and in again, to make a suitable thickness for grip; a neat turn-back .005 wide all round prevents the edges of the strip from cutting the hand, and gives a solid effect. The extension of the handle follows the curve (longitudinal and lateral) of the scraper, and is decorated along its back by 3 pairs of raised lines, the outer of which form the borders of the part of the extension beyond the ends of the turned-back border. The folded-in end of the handle strip abuts on ^{on inner part of handle at point where curved section begins} the beginning of the curved part, with 2 corner points and a central tongue.

(over)

* evidently not finished back for enough into plane of handle
Draws 14a

Film Vg 13.22

Film Vg 14.29

1:10

The object has been cleaned and waxed, the folded-in end of the handle pressed back into place (cf pre-cleaning photograph), and a central section of the scraper restored in wax; the resulting curve and length are somewhat inaccurate.

Film Vg 13.15

1:10

Film Vg 14

*Bronze bubbled with
corrosion. Quite thick,
suggesting one side nested
in other (fissure around
edge supports this)*
drawer

The side with the handle is flat and apparently undecorated. The opposite side slopes to a raised edge and a center raised nearly as high as the edge, and is decorated by encircling raised lines (broad ones bordered by narrow ones). The curved edge has a central fillet distinct all round, but this may be due to springing apart in corrosion. The handle has no connection with the bronze of the mirror case. The bent-back points of its fastening staples may have held it to a facing of wood or some other perishable stuff or possibly, as it is not in the center, it had no connection with the mirror case?

The mirror(?) M 272 fits, with margin, within the raised edge of the case.

(over)

Film Vg 14.14

14.14

1:4

The object has not been cleaned except that the dirt not immediately about the handle has been removed. Considerable corrosion, which has destroyed part of the left side of the handle, which was undercut in cleaning; note that the right side of the handle is in position as found.

V.G. 36.14

Found with M 340

Handle like M 332. Unlike M 332 handle, however, has lower part extending, with turned down edges, 0.027m beyond blade end to support handle end of blade on the projection's under side; the blade is in two parts- the blade proper that is fixed probably by welding to the under side of the handle's projection and encroaching upon the under side of the handle itself; and a blade like support, having the same shape and curve as the blade though a little more narrow and not so long; this support is sandwiched in between the upper side of the handle's

M 340a cont.

projection and the handle itself. The blade fits into the blade support along its full length (the full length of the support), and the two form practically a single piece. The support is pointed at its end; two grooves & two ridges run down its longitudinal axis, and a single groove on either edge. The end of the blade extending beyond the end of the support is missing. The strigil would appear to be otherwise complete save for two small pieces in under side of handle.

Handle found broken in 3 pieces; mended; blade & blade support found intact. Bronze badly affected by bronze disease; worse parts covered with wax to preserve it from further disintegration.

Sold Ear Ring

②

L: 0.031

Th. wire: 0.0005

Complete? Perhaps another piece
that attaches to ear. Good condition.

Two twisted thin wires looped
together: top piece has small loop
at top end & bent into large loop
at other end which holds second
part of earring. This lower part is
a coiled wire with a small loop
at either end.

(over)

St. Hermogenes, Pit 64

April 26, 1940

McC. I, p. 132, # 24

Check with photo.

Thin wire carrying found in matchbox labelled "Ay. Epm. 26-4-40,
Pit 64, p. 103 2e, F24" does not quite agree with above
description. Dangle lost?

Thin wire loop, one end slightly hooked. Max. diam., 0.013.
Tiny, semicircular piece, perhaps the hook broken off other end.

← slight thickening here.

M 818

Gold Ear Rings (2)

a) L: 0.029

b) L: 0.021

Both complete & in good condition

a) Two parts twisted together: top part, a narrow wire looped around forming a semicircle with its ends twisted together; a round knob on top. Lower part, wire looped to top part at one end & terminating in a ball or knob at other.

(over)

b) Similar to a, only more
ornate. Top part has half twisted
wire; ~~the~~ lower, a coil between
loop & knob, & 4 tiny granulations
below knob.

Metal Objects - 1

Uncatalogued, from Tomb 5:

Photo ✓ #21

Pres. L., 0.035 m.

Perhaps end of spatula? of MS15
Bronze.

Similar piece in box marked "Found in sieve, Tomb 5, near floor, Aug 1940."

Photo ✓ #22

Bronze nail with flattened head. Bent L., 0.073 m.

Crust of original surface
preserved on tip.

Max. D. head, 0.009 m.

Photo

✓ 23. Silver finial. Ball (hollow) on
pointed tang, joined by
collar.

H., 0.052 m.

D. ball, 0.023 m.

- over -

✓ #24 - 2 frag cosmetic rod - One end piece with thickened, rounded tip (Pres. L., 0.039 m.). Center section, square in section, non-forming (Pres. L., 0.049 m.) 

✓ #30 - Toggle pin with broad, flat nail head. Most of shaft missing. Pres. L., 0.024 m. D. head, 0.017 m. Hole in flattened shaft about 0.01 below head. 

✓ #33 - Mass of chips of flat bronze in bad state of health. Ignored (i.e. for record - but ought to be checked to avoid contamination!).

✓ #35, 92, 106, 115, 117-127, 162, 178, 184, 185, 209, 210
gold leaves, ~~as seen by 7-7-1 (at Linnova?)~~

✓ #50 - Mass of flat pieces of bronze in degraded condition.

✓ #51 - ~~Flat~~ Thin bronze disk, 0.08 m. in diameter, about 4/5 preserved. Small mirror? Patches very smooth + covered with beautifully green, flaky patina. Most of surface encrusted, however. With this a square-headed nail (?) with most of shaft missing (Pres. H., 0.011 m.; head 0.015 m. square.)  Fragments of similar disk, with green patina, in box marked "Found in sieve, Trench 5, near floor, Feb 14/40."

Metal Objects-2

Uncatalogued, from Tomb 5, CID.

- ✓ #83 - fragments (2) of small bronze chain, preserving 3 or 4 links
Photo (probably 4, since join not apparent). Pres. L., 0.006 + 0.007 m.
of #183.
- ✓ #86 - Fragments of flat bronze, decorated.
- ✓ #88 - Several fragments of flat bronze in fairly good condition.
- ✓ #110 - Trap of curved silver - possibly Reiss like #23?
- ✓ #116 - Gold earrings, ~~not seen~~ (in the case?) H. 0.026 m. 
wire, thickened for main loop.
- ✓ #145 - Bronze nail with flat head. D. head, 0.012 m. h., 0.047 m.
Photo

✓ #157. Small arrowhead; bronze; pres. L., 0.034 m. Section  Photo

✓ 159. Shaft of pin or nail in 3 sections (Pres. Total L., 0.071 m).
Round section. Bronze.

✓ 179. 2 frag. needle: 1 of shaft (Pres. L., 0.009 m.), 1 of end with
eye (Pres. L., 0.011 m.). Round section. Bronze.

✓ #183. Half a dozen very very small sections small link chain.
Photo → For several completely preserved links, cf. box marked
"Found in sieve, Tomb 5, near floor, Aug 1940."

✓ Pit 70, 1-20-1-60-2-4-41-P. 511-2.
Lead sheet 0.0015 thick - see sketch.

✓ 5 pieces metal slag found Pit 70
4.1940 pits especially.

Metal Objects - 3

Uncatalogued, from various areas:

- ✓ Bronze spike, 0.128 m. long, slightly bent. Head of moderate size. In box of uncatalogued metal fragments of iron, bronze etc. from Pit 85, April, 1948. (Other bits amorphous and not worth bothering about.) Photo v.g. 40.14.

✓ #28 from Tomb 3 (Met II, p. 305⁵). Two spirals of bronze, one rising clockwise, other counterclockwise. Each $1\frac{1}{2}$ turns. Round section, D. 0.006 m.

✓ #47 from Tomb 3 (Met II, p. 307). Silver ring. Flat, oval bezel (0.021 x 0.012 x 0.002 m.) with indistinct incaglio design. Band circular in section, a bit more than ~~hemispherical~~ ^{semicircular}. Bezel + band separated.

- over -

- ✓ Envelope with gold leaf - also a second one; both marked F1 + dated 9.4.1940.
~~Waterbury of gold leaves marked Pit 19. Gold leaf among remains.~~
- ~~Probably~~ P. 30, no. 1; found 9-4-1940, Pit 19, @ 5.90 under fallen roof
 in loose chavara fill among bones.
- ✓ Bronze nail - almost spike - in good condition. D. head, 0.016 m.
 h. (beet), 0.105 m. Original L., 0.125 m. about. Q. McC7 I, p. 30, #4.
 Found ^{Pit 48,} 60 cm. below rock in drains. 6.4.1940.
- ✓ Bronze nail. Pit 9, depth 0.45 m. 1-4-40. Q. McC7 I, p. 70, no. 9.
 Head missing, bent; condition good. Pres. L., 0.045 m.
- ✓ Flat piece of lead from Pit 32, depth 0.60 m., 4-4-1940. Q. McC7 I,
 p. 70, no. 10. Unwritten + unshaped. Max. dimen., 0.058 m.
- ✓ Gold leaves from Pit 19, found in strained earth in Tomb, 17-5-1940.
 Q. McC7 II, p. 216 - no. 30. 12 frags of leaves , originally
 about 0.02 m. long, made of gold foil. 3 clay beads +
 scraps of bronze found with them.
- ✓ Bronze bowl from Pit 48, SE Tomb, see cross section p. 71. Q. McC7 II, p.
 234, no. 36. Probably hemispherical; rim ^(most of it preserved) thickened interior;
 D., 0.20 m. circa; numerous frags; condition pretty good; surface pitted.

METAL OBJECTS - 4

0

✓ G. McF I, p. 286, no. 41. Pit 62. "One object lying on right side on man's right shoulder. Removed before filling June 20 - as no other bones skeleton left in tomb." Probably the bronze nail with adhering wood, labelled 20-6-40 (and faint traces of "F 41" left by silver fish). Tip bent. Head either broken off or hidden by encrustation. Bent length, 0.09 m. Total l., as preserved, 0.11 m.

3. head, 0.037 m.
Bronze nail, 0.062 m. long, found with pottery in bag labelled "X 64. 2.40-3.00. P. 105-34. 20-4-1940." Shaft square in section. Round head. Tip broken.

✓ head "found". Pit 64. 7-6-1940. G. McF. p. 189-7. In small bag of coarse muds. = M 890. re-

- ✓ Gold leaf, 0.021 m. long. Pit 19, Tomb 2. G.McF. II, p. 294, #21a.
- ✓ Bronze loop, like thin cotton pin, 0.015 m. max. l. Pit 19, Tomb 2. G.McF. II, p. 294, ^{no. 23}
- ✓ Dito, with both prongs preserved. Max. l., 0.015 m. Pit 19, Tomb 2. G.McF. II, p. 294, #24.
- ✓ Gold leaf, both ends bent over. Max. l., 0.017 m. No mention in notebooks, evidently; envelope labelled: "22-6-40. Gold leaf from Pit 19, Tomb 2, near floor, exact position uncertain, + 1 head.
The head like the ones in Find #30 on p. 216 — also from Pit 19.
- ✓ Numerous gold leaves, evidently not listed in notebooks, in envelope labelled: "18-4-40. Pit 19. Tomb. Gold leaf stream over remains."
- ✓ Numerous gold leaves, evidently not listed in notebooks, in matchbox labelled: "Pit 19. Gold leaf among remains." Largest, 0.022 m.
- ✓ Bit of iron 0.017 m. long, probably part of nail. Tomb 3, 24-6-40; G.McF. II, p. 305, no. 26.
- ✓ 3 bronze spirals; ~~one of 1 1/2 turns, other of 1 1/2 turns each~~ 2 stuck together so they look like one long one. D. "wire" 0.006 m. Much encrusted. Tomb 3, 24-6-40; G.McF. II, p. 305, no. 27.
- ✓ Over a dozen fragments of varying sizes of bronze bowl (?). Surface bubbled. Walls less than 1 mm. thick. Tomb 3; 24-6-1940; G.McF. II, p. 305, no. 29.
