Stone Objects, Palace, Kourion, Oct. Dec. 1948

St. 600 - Sandstone like stone, 16 cm high, 10 cm thick, 18 cm long. Found Room T, second layer, above East West wall, Palace 13 November 1948, small find no. 2.

Part of leg just above front part of foot and with part of heel, line of break running diagonally across foot. Angle bone, protrusion of marked on outside of foot; on an inside, this part broken away. Above heel and in back of ankle bone, there has been worn or cut away a part of original stone bearing a flat unarticulated surface. In addition on the inside at this level part has been broken away

St 601 marble, 10.5 cm high, max. dia. 6.1 cm., min. dia. appr. 4 cm. Hard white marble, found third layer Room I, 27 Oct. 1948, small find no. 3

Lower part of a left upper arm of statue, (statue's left arm) the lower part of arm was bent at approximately right angles to upper. The piece suggests that the statue with which it went was a young boy.

St 602, Sandy-stone like stone ~~for~~ for grinding about 34 cm in diameters, edge about 1.5 cm thick. Knob protrudes about 4 cm at base 3.7 cm thick at outer end 4.5 cm. Inside rubbed smooth, outside, rough and ring base.

From Palace. 16 Nov 1948 small find no. 4

St 603, marble bluish black with white streaks. part of shallow ~~bowl~~ basin for liquid. Inside, worn smooth; outside, rough. Base approximately 14 cm in dia. At bottom, vessel 2 cm thick; on upper edges, about 1 cm; mid-point, thickest 3 cm. Overhanging spout, round on top; triangular, on bottom, flanked by raised heart-shaped device (, raised about two or three millimeters

Palace 23 October 1948, surface find

St 604 Grinding stone, conglomerate, 8.7 cm high on end, 7 cm ~~round~~ toward center, maximum diameter 11 cm. Top side concave? semicircular and rough under side flat and smooth

St. ~~X~~ 605, Marble, white, about 3.8 cm thick. Corner piece, point of corner broken off. One side straight 6 cm; other side, rounded. 4 cm preserved. Both surfaces ~~rounded~~ smooth. Under surface a concave then convex surface, followed by straight surface .5 cm, but this only along ~~at~~ side with straight edge: side with rounded edge very slightly concave. Edge where meet undersurfaces of mouldings rounded off and slightly concave along rounded edge.
Upper surface corners all rounded, ~~p~~ particularly on rounded side. About 1 cm from outer edge upper surface, a groove .2 cm deep, .3 cm wide. About ~~a~~ 1 cm from outer edge of this groove, along the side with straight edge there is a concave moulding, and about ~~3.5 cm~~ 3 cm from same point, this concave moulding terminates in a surface piece at about 135°.
Found surface Room N on Northern part. 4 November 1948. small find no. 2

St. 606 Marble, creamy but with large grains. greatest dimensions ~~7½~~ 7.5 cm, 5 cm, 5.6 cm. Lower part of ~~knee~~ left knee of statuette, with back part of thigh. ~~preserved~~

St 606, found in plaster of Room L, 1 Nov 1948, small find no. 10

St 607. Granit-like bowl five pieces, two from A just above floor (9 Oct. 1948) and three from plaster in Room L (1 Nov. 1948, small find no. 11). Four pieces fit together, the fifth belongs but does not join. Rim 3.8 cm, the side diminishes curving inward to about 2.5 cm. On the out side, the edge is straight for about 1.8 cm. The diameter of the inside of the bowl was about 17 cm. The outside was left rough except for upper edge, the inside is rubbed smooth particularly in lower portion.

St 608 White marble with traces of blue, 13.6 cm wide on either maximum thickness 2.5 cm, on middle 2 cm. Edges straight for about 1 cm. Then bevelled. Under surface smooth except where it seems to have worn away. Upper surface within bevelled sides, rough. A small hole and two larger hollows within upper rough surface. On one bevelled edge in line with these holes, another small whole and part of bevelled edge hollowed out. Piece broken along line 9 cm from one end, 5 cm from side and 9 cm from other end of side. Fine dark ~~unman~~

~~M+ 500 Ston.~~

St 609 Hard stone ~~polished~~ surface. bell shaped
Maximum dimensions 5 cm high, 4.5 X 3.5 cm.
Lower ~~corner side por~~ corner piece chipped
off. All corners very much rounded. Hole
in top mouth of which 8 cm wide; 1.3 cm deep
Mycenean?

St. 610 Hard stone polished. Underside flat; upper,
more rounded. Pointed. Broken off. Neolithic?
Upper surface Room N

St. ~~610~~ 611 Marble fr. of basin polished inside and out.
Inside diameter about 16 cm. Thickness on rim
about .8 cm. Becoming thicker below. Lug on side.
Projecting 1.5 cm.; 1 cm thick; 4 cm wide. Marble
White Room E, SW portion 5th Layer. 25 Nov. 1948
Small find no. 9

~~L 500~~

L 501 . Fr. lamp type XXVII, clay red, discus with nozzle, rim very narrow. Room A 19.10.48 third layer

L 502 Fr. lamp type XXVIII, Rim with vine pattern and inside herring bone. Lamp oblong Clay brown. Broken off ~~a bow~~ below joint of ~~nozzle~~ upper and lower halves. Room E third layer, 25.10.48. Small find 8

L 503

Fr. lamp type XXVIII, ~~Rim~~ Underbody with piece of Rim. Clay reddish peels easily Elongated shape, Two incised rings on ~~base~~ edge of base. ~~Herring~~ Room E third layer 25.10.48 Small find 9.

L 504 Three fr. lamp type XXVIII, Underbody, piece of rim and handle. Handle low and unperforated Clay Brownish, On rim grape-vine pattern. On ~~discus~~ edge of discus branch. On discus design. O Hole for pouring in oil spot in front of handle. Base with ~~ba~~ raised ~~foot~~ hollow. Clay depressed and thinner. On upper side of bottom small depression with pointed ~~red~~ bottom. Perhaps from tool which made hole above. Shape elongated. Room E third layer near F+C Small find 1,2,3

~~L 500~~

L 501. Fr. lamp type XXVII, clay red, discus with rays, rim very narrow. Room A 19.10.48 third layer

L 502 Fr lamp type XXVIII, Rim with vine pattern and inside herring bone. Lamp oblong clay brown. Broken off ~~above~~ below joint of ~~rim~~ upper and lower halves. Room E third layer, 25.10.48. Small find 8

L 503

Fr. lamp type XXVIII, ~~Rim~~ Underbody with piece of Rim. Clay reddish peels easily Elongated shape. Two incised rings on ~~base~~ edge of base. ~~Hump~~ Room E third layer 25.10.48 Small find 9.

L 504 Three fr. lamp type XXVIII, Underbody, piece of rim and handle Handle low and imperforated Clay brownish. On rim grape-vine pattern. On ~~discus~~ edge of discus branch On discus, design. ⊕ Hole for pouring in oil just in front of handle. Base with ~~ba~~ raised. ~~foot~~ hollow, Clay depressed and thinner. On upper side of bottom small depression with pointal ~~bot~~ bottom Perhaps from tool which made hole above. Shape elongated Room E third layer near F+C Small find 1,2,3

L 505. Fr. lamp type XXVIII with handle rim and bottom. Clay brown. Handle unpierced Narrow pattern on rim. Grape clusters of On edge of discus branch. On bottom on upper side, small round indentation. Along East wall Room E, 27 Oct. 48 • Small find no. 1

L 506 Fr. lamp type XXVIII with handle part of rim Handle low unpierced. On Rim vine with two rows of circles. Clay brown. Room K corner near L+I first layer 30 Oct. 48 Small find no. 1

L 507 Fr. lamp type XXVIII with handle and rim. Clay gray. Handle unpierced pointed and low. Rim single row of circles. On edge of discus branch. Discus concave. Hole for oil off center. Two circles planning object, Shape ovular. Pointed. Room O second layer near N 2 Nov. 1948 Small find no. 5

L 508 Fr. lamp type XXVIII handle with rim clay light brown Hande small, unpierced. Part of side chipped off. On rim line of contiguous circles. In center of some circles dots. On out side of circles but between them, dots. On edge of discus branch. Beyond this circles widely spaced. Shape ovular but not markedly

L 505. Fr. lamp type XXVIII with handle rim and bottom. Clay brown. Handle unpierced Narrow pattern on rim. Grape clusters of On edge of discus branch. On bottom on upper side, small round indentation. Along East wall Room E, 27 Oct 48. Small find no. 1

L 506 Fr. lamp type XXVIII with handle part of rim Handle low unpierced. On Rim vine with two rows of circles. Clay brown Room K corner near L+I first layer 30 Oct. 48 Small find no. 1

L 507 Fr. lamp type XXVIII with handle and rim Clay gray. Handle unpierced pointed and low. Rim single row of circles. On edge of discus branch Discus concave. Hole for oil off center. Two circles flanking object, Shape ovular. Pointed. Room O second layer near N ~~So~~ 2 Nov. 1948 Small find no. 5

L 508 Fr. lamp type XXVIII handle with rim Clay light brown Hande small, unpierced. Part of side chipped off. On rim line of contiguous circles. In center of some circles dots. On out side of circles but between them, dots. On edge of disk, branch. Beyond this circles widely spaced. Shape ovular but not markedly

L 508 So. Handle protrudes out back. Room O second layer near N. 2-11-48 Small find no 6

L 509 Fr. handle with part of Rim. Type XXVIII Clay light brown. Handle unpierced. On rim, line of circles. On outside of circles but between them, rows of dots. On edge of discus. branch. Shape ovular. Handle protrudes backwards. Very similar to L 508. Room O second layer near N 2-11-48 Small find no. 7

L 510 Fr. Discus and rim but without handle. Type XXVIII Clay light brown. On rim circles not contiguous, and ~~but~~ with smaller circles or dots outside but between them. On edge of discus branch. In discus, cross. cross. with small circles on end of arms, larger at junction of arms. Blank spaces covered by circles. Hole for oil perforated from above. Traces of fire black around mouth. Shape ovular. Room O second layer Near N 2-11-48 Small find no. 8

L 511 Fr. Handle with part of rim type XXVIII. ~~Handle~~ rim Clay light brown. Handle unpierced part chipped off. Pattern on rim undistinguishable On edge of discus branch. Shape ovular. Handle protrudes backward. Room O second layer

L 508 So. Handle protrudes out back. Room O second layer near N. 2-11-48 Small find no 6

L 509 Fr. Handle with part of Rim. Type XXVIII Clay light brown Handle unpierced. On rim, line of circles. On outside of circles but between them rows of dots. On edge of discus, branch. Shape ovular. Handle protrudes backwards Very similar to L 508. Room O second layer near N 2-11-48 Small find no. 7

L 510 Fr. Discus and rim but without handle Type XXVIII Clay light brown. On rim circles not contiguous, and but with smaller circles or dots outside but between them. On edge of discus branch. In discus, cross, green, with small circles on end of arms, larger at junction of arms. Blank spaced covered by circles. Hole for oil perforated from above, Traces of fire black around mouth. Shape ovular. Room O second layer Near N 2-11-48 Small find no. 8.

L 511 Fr. Handle with part of rim type XXVIII. ~~Handle rim~~ Clay light brown. Handle unpierced part chipped off. Pattern on rim indistinguishable On edge of discus branch. Shape ovular Handle protrudes backward Room O second layer

L 511, Near N 2 Nov. 48 Small find no. 9

L 512 Fr. rim type XXVIII. Clay light brown. On rim, four rows of dots: on edge of discus, branch. Room O second layer Near N 2 Nov. 48

L 513 Fr. rim, type XXVIII Clay light brown. Vine with leaves and grapes on rim. Branch on edge of discus. Room O second layer Near N 2 Nov. 48

L 514 Various fr. type XXVIII Room O second layer Near N 2 Nov. 48 ~~mostly~~ all except one pieces from bottom

L 515 Fr. Rim and part of discus Type ~~XXVIII~~ XXVII. Clay grayish brown. Rim broad with vine and dots. On edge of discus says. Discus, hole off center. Man with amphora? Room O, hole 3 Nov. '48 Small find no. 1

L 516 Fr. Rim. Type XXVII Clay whitish Ovules on rim. Circulas. Discus no sign of decoration Room O, hole 3 Nov. '48 Small find no. 1

L 517 ? Fr. lower part, one type XXVIII. End spread out for handle? Room O, hole 3 Nov. 48 Small find no. 1

L 511, Near N 2 Nov. 48 Small find no. 9

L 512 Fr. rim type XXVIII. Clay light brown. On rim, four rows of dots. on edge of discus, branch Room O second layer Near N 2 Nov. 48

L 513 Fr rim, type XXVIII Clay light brown Vine with leaves and grapes on rim. Branch on edge of discus. Room O second layer Near N 2 Nov. 48

L 514 Various fr. type XXVIII Room O second layer Near N 2 Nov. 48 ~~mostly~~ all except one pieces from bottom

L 515 Fr. Rim and part of discus Type XXVII, Clay grayish brown Rim broad with vine and dots. On edge of discus rays. Discus, hole off center. Man with amphora? Room O, hole 3 Nov. 48 Small find no. 1

L 516 Fr Rim. Type XXVII Clay whitish Ovules on rim. Circular. Discus no sign of decoration Room O. hole 3 Nov. '48 Small find no. 1

L 517 2 Fr lower part, one type XXVIII, End spread out for handle? Room O, hole 3 Nov 48 Small find no. 1

L 518 Fr. Handle, rim and discus. Clay red. R Handle pierced from both sides, No grooves on it Rim plain. Discus plain. Hole in center of Discus. Room O, fourth layer. 3 Nov. 48 Sml find no. 14. Shape of twenty-seven.

L 519 Fr. Rim and discus Clay reddish on inside, white on outside. Rim pine trees and Ionic capital. Remnen, ridge, depression discus Lobster? Two claws, two eyes and four locks of hair. Hole for rod slightly off center. Shape round. Type XXVII Room O. fourth layer 3 Nov. 48 Sml. find no. 15

L 520 Fr. Rim and discus Clay reddish. On rim, single leaves. Ridge, slight bump discus. ~~Fig of~~ Figure of man much faded. R Circular shape Form of Type XXVII. Room O fourth layer 3.11.48,

L 521 Fr. Rim and handle. Clay light brown. Handle low unpierced. Rim narrow. Pairs of leaves with four ends? ~~On ridge 6~~ Between rim and discus branch. On discus, traces of design. Hole off center. Shape ovular Type XXVIII Room O Third layer. V. L 523 ~~1 sq~~ pins fr. of underbody

L 518 Fr. Handle, rim and discus. Clay red. R Handle pierced from both sides, No groves on it Rim plain. Discus plain Hole in center of Discus. Room O, fourth layer. 3 Nov '48. Sml find no. 14. Shape of twenty-seven.

L 519 Fr. Rim and discus. Clay reddish on inside, white on outside. Rim pine trees and Ionic capital. Depressen. ridge, depression discus. Lobster? Two claws, two eyes and four locks of hair. Hole for rod slightly off center. Shape round. Type XXVII Room O. fourth layer 3 Nov. 48 Sml. find no. 15

L 520 Fr. Rim and discus. Clay reddish. On rim, single leaves. Ridge, slight hump discus. ~~Fig of~~ Figure of man much faded. A Circular shape Form of Type XXVII. Room O fourth layer 3.11.48.

L 521 Fr. Rim and handle. Clay light brown. Handle low unpierced. Rim narrow. Pairs of leaves with four buds? ~~On ridge b~~ Between rim and discus branch. On discus, traces of design. Hole off center. Shape ovular Type XXVIII Room O Third layer. V L 523 Plus fr. of underbody

L 522 Fr. handle, rim and bottom. Clay ~~grey~~ light brown. Handle unpierced. Back vertical Rim narrows with dots. Ovular shape Type XXVIII Room O third layer 3 Nov. 1948 Small find no. 7. V. ~~L523~~

L 523 Fr. Rim. same pattern and size as ~~L522~~ L521 probably fr of this. With hole for nozzle. Lamp seems to have been used - no traces of fire. Room O ~~third~~ third layer 3 Nov. 1948 Small find no. 7 V. L521

L 524 Fr. Rim. Vine with grapes. On edge, branch Clay light brown. Type XXVIII. Room O third layer 3 Nov. 1948. Small find 6+7

L 525 Fr. Rim. Clay light brown. Rim narrow. Single row of circles. Branch on edge of discus. Part of hole for oil preserved. Part of nozzle. Lamp used traces of fire. 3 Nov 1948. Small find 6+7 Room O third layer

L 526 Fragments of ~~wop~~ unclen parts of lamps Room O third layer 3 Nov 1948 Small finds 6+7

-22 Fr. handle, rim and bottom Clay ~~grog~~ light brown. Handle unpierced. Back vertical Rim narrows with dots Ovular shape Type XXVIII Room O third layer 3 Nov. 1948 Small find no. 7. V. ~~L523~~

L 523 Fr Rim. ~~Same~~ pattern and size as ~~L522~~ L521 probably fr of this. With hole for nozzle. Lamp seems to have been ~~un~~used - no traces of fire Room O ~~third~~ third layer 3 Nov. 1948 Small find no. 7 V. L521

L 524 Fr Rim. Vine with grapes. On edge, branch Clay light brown Type XXVIII. Room O third layer 3 Nov. 1948. Small find 6+7

L 525 Fr. Rim. Clay light brown. Rim narrow. Single row of circles. Branch on edge of discus. Part of hole for oil preserved Part of nozzle. Lamp used traces of fire 3 Nov 1948. Small find 6+7 Room O third layer

L 526 Fragments of ~~nop~~ underparts of lamps. Room O third layer 3 Nov 1948 Small finds 6+7 9 3

L 527 Fr. Rim Edge of rim with nozzle Clay brown Nozzle definite protrusion. Traces of fire Lamp used. Type 28. Room O fill layer 4 Nov. 1948 Small find no. 17

L 528 4 Fr. probably from one lamp. Room O fourth layer Northern part ~~Sec~~ 4 Nov. 1948 Small find no. 7

L 529 Fr. Rim with part of discus. Dark brown. Rim broad. Sets of ~~three~~ ovules around ~~circle~~ ridge separating Rim from discus. Two outer ovular arches over inner ovular object. Outsides of outside ovular arches are not contiguous Discus plain. Inner ring Circular shape Type XXVII. Room O fourth layer South side 4 Nov. 1948 Small find no. 5

L 530 4 Fr. Lamp. Parts of nozzle discus and rim. Dark brown, reddish tinge. Rim plain. Discus plain Nozzle does not protrude. Circular. Shape Type XXVII Room O fourth layer South Encl 4.11.48 Small find no. 8

L 531 3 Fr. Lamp, one rim with blurred blobs and part of nozzle. Traces of fire: two, rim with vines and branch on edge of discus. three, bottom

L 527 Fr. ~~Rim~~ Edge of rim with nozzle Clay brown Nozzle definite protrusion. Traces of fire Lamp used Type 28 Room O fifth layer 4 Nov. 1948 Small find no. 17

L 528 4 Fr. probably from lamp. Room O fourth layer Northern part ~~Sec~~ 4 Nov 1948 Small find no. 7

L 529 Fr. Rim with part of discus. Dark brown. Rim broad. Sets of ~~three~~ ovules around ~~circle~~ ridg separating Rim from discus. Two outer ovular arches over inner ovular object Outsides of outside ovular arches are not contiguous Discus plain Inner ring Circular shape Type XXVII. Room O fourth layer South side 4 Nov. 1948 Small find no. 5

L 530 4 Fr. Lamp. Parts of nozzle disk and rim. Dark brown, reddish tinge. Rim plain, Discus plain Nozzle does not protrude. Circular Shape Type XXVII Room O fourth layer South End 4.11.48 Small find no. 8

L 531 3 Fr. Lamp, one rim with blurred blobs and part of nozzle. Traces of fire: two, rim with vines and branch on edge of discus: three, not on

L 531 Fr. of lamp. Room O 5th layer in soft part
4.11.48.

L 543 Fr. bottom half. Clay brown. Indication of nozzle. Rear protrusion for handle. Clay peeling. Ovular shape. Type XXVIII East of Room M in corner. west of fallen column. 18 Nov. 1948 Small find no. 6

L 544 Fr. bottom of Clay brown. Shape ovular but not small. Early type XXVIII. Outside of Room U on South Side Second layer 19 Nov 1948

L 541. Fr. Handle. Light brown clay. Handle semi-pierced. ~~Rising to peak at top~~ Coming to edge at top. Support below, seems made for more substantial handle. Shape almost circular, Transitional between types XXVII and XXVIII. Room S third layer 16 Nov. 1948 Small find no. 3

L 542 Fr. bottom half. ~~of~~ Clay red. Traces of fire way inside nozzle. Center of bottom ~~off~~ above level of sides. Some protrusion for nozzle Shape ovular Early Z XXVIII. Third layer East of Room M South of T. 18 Nov 1948 Small find no. 3

L 543 Fr. bottom half. Clay brown. Indication of nozzle. Rear protrusion for handle. Clay peeling. Ovular shape. Type XXVIII East of Room M in corner west of fallen column. 18 Nov. 1948 Small find no. 6

L 544 Fr. bottom of Clay brown. Shape ovular but not small. Early type XXVIII. Outside of Room M on South Side Second layer 19 Nov 1948

L 545 Fr. piece of rim. Clay light brown. Rim decorated only with circles on edge branch. Circular Type XXVIII Room S1 bottom of tumble 23. Nov. 1948 Small find no. 5

L 546 Fr. Rim with handle, part of discus. Clay, light brown. Handle, unpierced. On rim, vine and grape pattern, much blurred. Small ridge separates rim from discus. Hole of discus in front of handle. Blurred pattern on discus. Possibly man with jar. Shape manifestly ovular 23. Nov. 1948 Small find no. 6 Room S1 bottom of tumble

L 547 Fr. Bottom. Clay brown. Center of bottom raised off ground. Nozzle traces of fire Shape ovular. West Edge drain North of Room S1 24 Nov. 48 Small find no. 2 Type XXVIII

L 548 Fr. Handle Semi-pierced. Clay light brown. Not careful workmanship. Type XXVII - XXVIII. East of Hypocaust first layer. 20 Nov. 1948 Small find no. 1

L 549 Fr. with handle, rim and discus. Clay gray On rim vine with grapes. On Edge of discus, lines. On discus, man with jar and grapes. Hole above jar Pattern cf. L546. Shape ovular. Probably Room E fifth layer. 25 Nov. 1948 Small find no. 1. Type XXVIII

clay light brown.

L 545 Fr. piece of rim, Rim decorated only with circles on edge branch. Circular Type XXVIII Room S[1] bottom of tumble 23 Nov. 1948 Small find no. 5

part of discus

L 546 Fr. Rim with handle, Clay, light brown Handle, unpierced. On rim, vine and grape pattern much blurred. Small ridge separates rim from discus. Hole of discus in front of handle. Blurred pattern on discus. Possibly man with jar. Shape marredly circular 23 Nov. 1948 Small find no. 6 Room S[1] bottom of tumble

L 547 Fr. Bottom. Clay brown. Center of bottom raised off ground. Nozzle traces of fire. Shape circular. West Edge drain North of Room S[1] 24 Nov 48 Small find no. 2 Type XXVIII

L 548 Fr. Handle Semi-pierced. Clay light brown. Not careful workmanship. Type XXVII - XXVIII. East of Hypocaust first layer 20 Nov. 1948 Small find no. 1

L 549 Fr. with handle, rim and discus. Clay gray On rim vine with grapes On Edge of discus, lines On discus, man with jar and grapes. Hole above jar Pattern of L 546. Shape circular Probably Room E f.f.l. layer 25 Nov 1948 Small find no. 1 Type XXVIII

Lamps Palace
Oct. Dec '48

L 550. Fr. lamp. Rim and part of side. Clay Brown Particles of brown substance in it. Rim narrow pattern on it blurred. Plane broad ridge separates it from discus. Shape ovular Type XXVIII not early. Room E ~~fifth layer~~ S IV portion fifth layer.

L 551 Fr. lamp. Side and part of bottom. Clay Grayish. Well, kneeled. Shape ovular. Room E, NW portion, 3 third layer. 26 Oct. 1948. Small find no. 5

L 552 Fr. lamp. Rim and part of discus. Clay, brown, full of small darker brown particles. Rim broad. Decoration blurred - a tree? Below tree?, a vais portion - knob?. Discuss separated by two grooves. Discus plain Shape ovular. Type XXVII. Room E, NW portion. 3 third layer. 26 Oct. 1948. Small find no. 6

L 550. Fr. lamp. Rim and part of side. Clay Brown. Particles of brown substance in it. Rim narrow pattern on it blurred. Plane broad ridge separates it from discus. Shape ovular. Type XXVIII not early. Room E ~~fifth layer~~ SW portion fifth layer.

L 551 Fr. lamp. Side and part of bottom. Clay Grayish. Well kneaded. Shape ovular. Room E, NW portion, 3 third layer. 26 Oct 1948. Small find no. 5

L 552 Fr. lamp. Rim and part of discus. Clay, brown, full of small darker brown particles. Rim broad. Decoration blurred – a tree? Below tree?, a rays portion – knob? Discus separated by two grooves. Discus plain. Shape ovular. Type XXVII. Room E, NW portion, 3 third layer, 26 Oct. 1948. Small find no. 6

In Inscriptions from Palace 19 October - 2 Dec. 1948

Ins. 100. Piece of marble, smooth on both sides, 2 cm thick. Letters roughly incised with triangular groove, almost certainly from triangular shaped gouge. Letters .7 to .8 cm high. Top of row below just enough preserved to show existence. Top row of letter thus

Marble whitish with blue streaks.
Found top layer, Room L, Palace, Kourion, 28·10·48, small find no. 6

Ins. 101 Piece of marble, .1 cm thick, roughly triangular in shape, 1.cm x .95 x .85. marble large crystals with lines running through it, back side all smooth; front side, below letters .1 cm, surface changes from smooth to rough. Letters neatly cut .3 cm high. Possible traces of letter before alpha. Letters thus

Found fifth layer, Room E, Palace, Kourion
23·11·48

Cards made

~~A 400~~

A 401, Marble Whitish, roughly triangular in shape. 1.8 cm thick, (9cm, 18cm, 19cm) back and front smooth. Sides 18 cm, 19cm long broken, 9cm probably broken but possibly rough hewn. Design roughly cvorved, spiral.
Room N, NE Corner, in white plaster, 11 November 1948
Small find no. 8

A 402, Marble grayish. 1.8 cm thick, both ~~sides~~ surfaces smooth. Roughly triangular in shape 13.5 cm x 13.5 x 12.5 All sides broken. Engraved lines, some deeper than others, no pattern apparent. Surface
Room K, 28 October 1948. Small fragment no. 10

A 403 Marble grayish, 1.5 cm thick bottom and upper surfaces smooth. Roughly rectangular 8 X 5.5 cm Cement on back. Two sides broken. Of the other two, one appears to be ~~broke~~ rounded of which a small portion has been worn away, the other appears to be cut straight. About 1.5 cm from top of rounded ~~the~~ edge, there is differentation on surface of marble on the surface with lines. Not only are there lines ~~on this one~~ on the upper surface, but there are spaces which have been carved out.
Room N, first layer, 3 November 1948, Small find no. 4

A 401, Marble whitish, roughly triangular in shape 1.8 cm thick, (9 cm 18 cm 19 cm) back and front smooth. Sides 18 cm 19 cm long broken 9 cm probably broken but possibly rough hewn Design roughly worked, spiral.
Room N NE Corner, in white plaster, 11 November 1948
Small find no. 8

A 402, Marble grayish. 1.8 cm thick, both surfaces ~~sides~~ smooth. Roughly triangular in shape 13.5 cm x 13.5 x 12.5 All sides broken. Engraved lines, some deeper than others, no pattern apparent. Surface
Room K, 28 October 1948, Small fragment no. 10

A 403 Marble grayish, 1.5 cm thick bottom and upper surfaces smooth Roughly rectangular 8 X 5.5 cm Cement on back Two sides Broken. Of the other two, one appears to be ~~broke~~ rounded of which a small portion has been worn away, the other appears to be cut straight. About 1.5 cm from top of rounded ~~ed~~ edge there is differentation on surface of marble on the surface with lines. Not only are there lines ~~on this~~ on the upper surface, but there are spaces which have been carved out.
Room N. first layer, 3 November 1948, Small find no. 4

A 404. Marble, grayish, 1.7 cm thick, rectangular 5 x 15 to 17. Two sides broken. One end cut square, other side rounded. Hole .5 cm in diameter, 4 cm from end. Center nearer surface without lines. 1.5 cm to about 2 cm from rounded edge, roughening of surface on side with lines, this roughening amounts to a wearing away. Incised lines perhaps branches continue into this roughened area. Room N first layer 3 November 1948. Small find no. 3

/

A 405. Marble, white, 1.7 cm thick rectangular 12 x 7 cm maximum dimensions. Three sides broken. Other side bevelled back slightly. Back surface covered with cement. About 4.2 cm from straight edge, a hollow, .6 4.7 cm wide 2 cm 4.3 cm deep. About 6 cm from straight edge another larger hollow but this has been ~~cut out~~ broken off. About in middle of 1.7 cm thickness and on bevelled side a hole .5 cm in diameter which is stopped up by what appears ~~on~~ a metal object This hole extends for about 2.5 cm where another hole from the surface without cement ~~come to meet~~ opens into it. This hole is about .4 cm in diameter Room E first layer third portion, 11 November 1948, Small find no. 10

A 404 Marble, grayish, 1.7 cm thick, rectangular 5 x 15 to 17. Two sides broken. One end cut square, other side rounded. Hole 5 cm in diameter, 9 cm from end. Center nearer surface without lines. 1.5 cm to about 2 cm from rounded edge, roughening of surface on side with lines, this roughening amounts to a weaving away Incised lines perhaps branches continue into this roughened area. Room N first layer 3 November 1948. Small find no. 3

/

A 405 Marble, white, 1.7 cm thick rectangular 12 x 7 cm maximum dimensions. Three sides broken. Other side bevelled back slightly. Back surface covered with cement. About 4.2 cm from straight edge, a hollow, 6.4 cm wide 2 cm & 3 cm deep. About 6 cm from straight edge another larger hollow but this has been ~~cut out~~ broken off About in middle of 1.7 cm thickness and on bevelled side a hole .5 cm in diameter which is stopped up by what appears ~~an~~ a metal object This hole extends for about 2.5 cm where another hole from the surface without cement ~~connects~~ opens into it. This hole is about .4 cm in diameter Room E first layer third portion, 11 November 1948, Small find no. 10

A 406. Marble, whitish, 2 cm thick, thinning on top to 1.5 cm. Roughly rectangular, 6 x 15 cm. ~~Bow~~ Three sides broken off. Fourth cut straightly but worn away. On back 3 cm from edge a line beyond which marble white with traces of cement. On front, 3 cm from edge a groove one cm or wide .3 cm deep. Beyond this groove traces of cement. Where are the traces of cement, a groove 1.5 cm wide .3 cm deep. The edge of this groove along straight edge has been chipped away. Room 2, above plaster, 4 Nov. 1948. Small find no. 3

A 407 Marble bluish with streaks 2.4 cm thick. Roughly triangular in shape 5 x 5.5 x 6 cm. Both surfaces smooth but back had ~~plast~~ cement. All sides broken. Incised lines two circles.

A 408 ~~Gn~~ Marble grayish 1.7 cm thick, two long sides roughly chords of circle 28 cm in diameter all sides broken. Under surface smoother with traces of cement and plaster; a series of ~~dot~~ depressed dots along two sides. Middle hollowed out, to depth of about .4 cm: one side goes down abruptly, the other gradually. On front surface, two engraved chords, either ~~sid~~ outer side of which lines diagonal, parts of leave or tree

A 406. Marble, whitish, 2 cm thick, thinning on top to 1.5 cm. Roughly rectangular, 6 x 15 cm. ~~Bro~~ Three sides broken off. Fourth cut straightly but worn away. On back 3 cm from edge a line beyond which marble white with traces of cement. On front, 3 cm from edge a groove one cm ~~of~~ wide .3 cm deep. Beyond this groove traces of cement. Where are the traces of cement, a groove 1.5 cm wider .3 cm deep. The edge of this groove along straight edge has been chipped away Room Q, above plaster, 4 Nov 1948, Small find no. 3

A 407 Marble bluish with streaks 2.4 cm thick. Roughly triangular in shape 5 x 5 5 x 6 cm, Both surfaces smooth but back had ~~plast~~ cement. All sides broken. Incised lines two circular

A 408 Fr Marble grayish 1.7 cm thick, two long sides roughly chords of circle 28 cm in diameter all sides broken, Under surface smoother with traces of cement and plaster a series of ~~dots~~ depressed dots along two sides. Middle hollowed out, to depth of about .4 cm one side goes down abruptly, the other gradually On front surface, two engraved chords, either ~~side~~ outer side of which lines diagonal, parts of leave or tree

A 408, Found in passage leading into ~~Room~~ wall ~~under~~ blocking off cellar ~~in~~ Outside to West Room O. 23 October 1948.

A 409 Marble whitish, 2 cm. thick, roughly rectangular, on front, 13.5 cm x 8 cm, under surface appror. 12 cm x 7 cm. corner piece, ~~upper left or lower right~~. Outer edges bevelled inner broken. On ~~bottom~~ under surface plaster; on upper, two lines of depressed moulding. On one side, this moulding begins 2.8 cm from edge on other side 2.5 cm from edge. This outer line about 1 cm wide and deeper on side 2.5 cm from edge. A ridge between two lines of depressed moulding .2 to .4 cm in width flatter .5 to .6 cm on side with deeper groove. The inner groove is about 1 cm wide. Both these grooves extend beyond ~~those~~ their meeting with the groove coming from right angles. Found S E corner of Room N in darker plaster 12 November 1948

A 408, Found in passage leading into ~~Room~~ wall ~~under~~ blocking off cellar ~~on~~ outside to West Room O. 23 October 1948

A 409 Marble whitish, 2 cm. thick, roughly rectangular, on front, 13.5 cm x 8 cm, under surface appror. 12 cm x 7 cm corner piece, upper left or lower right. Outer edges bevelled inner broken. On ~~bottom~~ under surface plaster; ~~on~~ upper, two lines of depressed moulding. On one side, thus moulding begins 2.8 cm from edge on other side 2.5 cm from edge. Thu outer line about 1 cm wide and deeper on side 2.5 cm from edge. A ridge between two lines of depressed moulding .2 to .4 cm in width flatter .5 to .6 cm on side with deeper groove. The inner groove is about 1 cm wide. Both these grooves extend beyond ~~thore~~ their meeting with the groove coming from right angles. Found S E corner of Room N in darker plaster 12 November 1948

A 410, Sandstone, maximum thickness 8.4 cm. Corner piece, preserved with straight edge 15cm. on one side 13 cm. on the other. On edges about 3 cm. be with upper surface sloping backup and becoming thicker. Pattern of three leaved groups, three on each side with diagonal composed of joining of two outer leaves of two groups. Each group of threes separated by hollowing out of stone. Central diagonal leave has a rectangular stem and a bud like end. Leaves come out from another corner first layer of which is concave surmounted by two straight edges cornering, the top receding from one below .9cm; the lower recedes from concave about 1.5cm. The two straight edged ones are about .8cm high. The bottom of the leaves bedded down in a convex curve resembling that further surmounted by two straight edge corners. This piece was presumably meant to be seen from below. Found Room N North half second layer 4 Nov. 1948. Small find no. 9

A 411 Sandstone, maximum height 16 cm. It extends back from front-face, a maximum of about 14 cm. a maximum width of about 7 cm. Two halves of ~~a~~ two groups of leaves arranged in pairs with part of stem of leave ~~which~~ above ~~the pair~~ The meeting point of the pair

A 410 Sandstone, maximum thickness 8.4 cm. Corner piece, preserved with straight edge 15 cm. on one side 13 cm on the other. On edges about 3 cm. b~~a~~ with upper surface sloping back up and becoming thicker. Pattern of three leaved groups, three on each side, with diagonal composed of joining of two outer leaves of two groups. Each group of threes separated by hollowing out of stone. Central diagonal leave has a rectangular stem and a bud like end. leaves come out from another corner first layer of which is concave surmounted by two straight edges cornering, the top receding from one below .9 cm; the lower recedes from concave about 1.5 cm. The two straight edged ones are about .8 cm high. The bottom of the leaves bended down in a convex curve resembling that further surmounted by two straight edge corners. This piece was presumably meant to be seen from below. Found Room N North half second layer 4 Nov. 1948. Small find no. 9

A 411 Sandstone, maximum height 16 cm. It extends back from front-face, a maximum of about 19 cm. a maximum width of about 7 cm. Two halves of ~~of~~ two groups of leaves arranged in pairs with part of stem of leave ~~which~~ above ~~the pair~~ the meeting point of the pair

A 411. The only two original surfaces preserved are the front with the leaves and the straight bottom surface. This is presumably part of a moulding which was meant to be ~~tossed~~ seen face to face, and not from below. Found Room K, second layer 28 October 1948. small find no. 7.

A 412 Sandstone, upper part of moulding with leaves. ~~No original surface preserved except for front.~~ Rectangular stem flanked by leaves and with leaves growing out from it. On top ~~of~~ but away from front another stem seems to protrude. It has been cut away ~~on all sides~~ for about 180°. ~~From~~ Room L. fill, 28 Oct. 1948, Sm. find no. 2. Top leaves project out 4 cm. See A 413

A 413 Sandstone, leaves, part of moulding. Maximum distance across 10 cm. Top leaves protrude 4.5 cm. This piece is similar to A 412 only it has been broken off higher up. It shows that the groove made by drill on either side of rectangular stem spread. ~~It also~~ out. Moreover A 413 is badly preserved. Room L. fill 28 Oct. 1948 Sm. find no. 1

A 414 Sandstone, leaves, three together flanked on both sides presumably by other leaves.

A 411. The only two original surfaces preserved are the front with the leaves and the straight bottom surface. This is presumably part of a moulding which was meant to be ~~found~~ seen face to face, and not from below. Found Room K, second layer 28 October 1948 small find no. 7.

A 412 Sandstone, upper part of moulding with leaves. ~~No original surface preserved except for front~~ Rectangular stem flanked by leaves and with leaves growing out from it. On top a bit away from front another stem seems to protrude. It has been cut away ~~on all sides~~ for about 180°. For Room L, first fill 28 Oct 1948. Sm. find no. 2. Top leaves project out 4 cm. See A 413.

A 413 Sandstone, leaves, part of moulding. Maximum distance across 10 cm. Top leaves protrude 4.5 cm. This piece is similar to A 412 only it has been broken off higher up. It shows that the grooves made by drill on either side of rectangular stem spread ~~to~~ out. Moreover A 413 is badly preserved. Room L, 1st fill 28 Oct 1948. Sm. find no. 1.

A 414 Sandstone, leaves, three together, flanked on both sides presumably by other leaves.

A 414. The group of three leaves protrude Room L first fill 29/28 Oct. 1948. Small find no. 3

A 415 Sandstone piece of ~~a~~ leaves. Maximum dimensions 7 cm by 5 cm. thickness. This piece resembles A 411, both in the grouping of leaves by threes but also in the hole which separates each group. ~~of three~~ However, one side is cut straight so either it fitted next to another piece or else marked some kind of end. Room L first fill 28 Oct. 1948 Small find no. 11

A 416 Sandstone with dentillation, teeth 2 cm x 2.5 cm and 3 cm wide that is one tooth preserved. dentillation surmounted by concave moulding. Room L first layer 28 October 1948 small find no. 5

A 417 Sandstone with straight moulding 1 cm high 4 cm broad, above bottom end of block by ~~a~~ 5 cm. above middle straight line, another projection 1 cm and 1.5 cm with straight line surmounted by concave moulding. This an end a corner piece; maximum height 19 cm; it was back at 8 cm and along front preserved at least, 10.5 cm. 28 October 1948, Room L first layer, small find no. 4

A 414, The group of three leaves protrude Room L first fill 28 Oct. 1948, Small find no. 3

A 415 Sandstone piece of ≠ leaves. Maximum dimensions 7 cm by 5 cm. Thickness. This piece resembles A 411, both in the grouping of leaves by threes but also in the hole which separates each group. ~~of three~~ However, one side is cut straight so either it fitted next to another piece or else marked some kind of end. Room L first fill 28 Oct. 1948 Small find no. 11

A 416 Sandstone with dentillation, teeth 2 cm x 2 cm and 3 cm wide that is one tooth preserved dentillation surmounted by concave moulding. Room L first layer 28 October 1948 small find no. 5

A 417 Sandstone with straight moulding 1 cm high 4 cm broad, above ~~end~~ bottom of block by ≈ 5 cm. above middle straight line, another projection 1 cm and 1.5 cm with straight line surmounted by concave moulding. This a corner piece; maximum height 19 cm; it was back at 8 cm and along front preceded at least, 10.5 cm. 28 October 1948, Room L first layer, small find no. 4

A 418, Sand-stone. with moulding A rounded surface projecting about 2.4 cm, surmounted by concave surmounted by straight indentation of .5 cm. The rounded is flat on underside and where it meets concave moulding about 2 cm wide. Maximum length preserved 7 cm. Found Room K third layer.

A 420, Sandstone maximum dimensions 9 x 6 x 3 cm. part of Cyprian mutule, underside and one side preserved. Mutule 2.5 cm wide, surmounted rectangle .9 cm wide, .8 cm high. the latter surmounted by ovalo preserved horizontal distance 2.5 cm and vertical 2 cm. On the underside of mutule lines engraved, coming to sharp point. The problem here is why is the mutule cut in half. Room L first layer 29.10.48 Small find no. 2

A 421 Sandstone, maximum dimensions 7.5, 6, and 5.5 cm. A circular volute, appx max outside diameter 4.5 cm; appx. max. diameter of eye 1.8 cm. Hollowed by means of a drill around eye, to add a depth of around 1.5 cm. Flowers grow out of side The width of a volute about .8 cm, separated from adjoining stone by drill holes. Room L first layer 29.10.48 Small find no. 1

A 418, Sandstone, with moulding A rounded surface projecting about 2.4 cm, surmounted by concave surmounted by straight indentation of .5 cm. The rounded is flat on underside and where it meets concave moulding about 2 cm wide. Maximum length preserved 7 cm. Found Room K third layer.

A 420, Sandstone maximum dimensions 9 x 6 x 3 cm. part of Cyprian mutule, underside and one side preserved. Mutule 2.5 cm wide, surmounted rectangle, 9 cm wide, .8 cm high, the latter surmounted by ovolo, preserved horizontal distance 2.5 cm and vertical 2 cm. On the underside of mutule lines engraved, coming to sharp point. The problem here is why is the mutule cut in half. Room L first layer 29.10.48 Small find no. 2

A 421 Sandstone, maximum dimensions 7.5, 6, and 5.5 cm. A circular volute, appx max outside diameter 4.5 cm; appx. max diameter of eye 1.8 cm. Hollowed by means of a drill around eye, to add a depth of around 1.5 cm. Flowers grow out of side The width of a volute about .8 cm, separated from adjoining stone by drill holes. Room L first layer 29.10.48 Small find no. 1

A 422. Sandstone. two surfaces preserved one with round object ~~about~~ semi-circular 3.5 cm in diameter, beyond this straight line for 5 cm maximum length of surface 16 cm. On other surface, rounded object extends for about 3 cm underneath it engraved line and in middle just above line, hole, 4 cm wide about 1 cm deep Underneath this hole, line engraved about 1.5 cm long. Along edge, ℄ cyma reversa, 3 cm wide, each of three parts about 1 cm wide. In rest of surface spiral, outside widest dimension 4 cm. width of ridge about .6 cm. Part of inside made by drill .4 cm wide. On third side, trace of rounded ridge, about 1 cm wide, about 8 cm preserved. Room L First layer, 28 Oct. 1948 Small find no. 3

A 423

Sandstone. Maximum dimensions 6 x 4 x 4 cm. Three leaves curled over with hole about .4 cm drilled vertically through each one. Beside these, traces of another leave. Room K, second layer near L 30 Oct. 1948 small find no. 4.

A 424 Stone ~~ovalo~~ ovolo, preserved for 6 cm, 2 cm high. Straight for 1.5 cm, right angle corner, straight for .7 cm beyond this trace of another surface at right angles to ℄ .7 cm surface. Maximum length 6.2 cm. Area north of Building Third layer 11-11-48 Small find no. 12

A 422. Sandstone. two surfaces preserved one with round object ~~about~~ semi-circular 3.5 cm in diameter, beyond this straight line for 5 cm maximum length of surface 16 cm. On other surface, rounded object extends for about 3 cm underneath it engraved line and in middle just above line, hole, 4 cm wide about 1 cm deep. Underneath this hole; line engrave about 1.5 cm long. Along edge, f: cyma reversa, 3 cm wide, each of three parts about 1 cm wide. In rest of surface spiral, outside widest dimension 4 cm, width of ridge about .6 cm. Part of inside made by drill .4 cm wide. On third side, trace of rounded ridge, about 1 cm wide, about 8 cm preserved. Room L First layer, 28 Oct. 1948 Small find no. 3

A 423

Sandstone. Maximum dimensions 6 x 4 x 4 cm. Three leaves curled over with hole about 4 cm drilled vertically through each one. Beside these, traces of another leave. Room K, second layer near L 30 Oct 1948 small find no. 4.

A 424 Stone ovalo, preserved for 6 cm, 2 cm high. Straight for 1.5 cm, right angle corner, straight for .7 cm beyond this trace of another surface at right angles to f. 7 cm surface. Maximum length 6.2 cm. Area north of Building third layer 11-11-48 Small find no. 12

A 425 Sand stone. Small piece similar to A 420 Fundort?

A 426 Sand stone. Double spiral. maximum width 4.5 cm. Maximum outside diameter 6 cm Maximum width of Spiral 1 cm, on ~~sid~~ side with eye of spirals. On other side, each spiral ~~curves between~~ diminishes from 1.5 cm to 1 cm. On back of spirals, hole just about below depression which separates them .4 cm 2 cm deep 6 cm then biforcates: one branch 1 cm wide; other, 2.5 cm. In 2.5 cm wide one drilled through .4 cm wide Fundort? 3.11.48 no 11?

A 427 White Marble. 1.9 cm thick, roughly rectangular 16.5 x 4.7 cm. Three sides Broken. Other side bevelled. Groove about .8 cm wide whose lowest edge is about 2 cm from bevelled edge. This grove not continuous makes right angle turn. About 4 cm from this, another similar corner of grooved lines parallel. Room N first or second layer 3 Nov. 1948 Small find no. 9.
