CURIUM: CEMETERY AT ST. HERMOGENES: TRENCH 43.

P 1564
Tomb 9, 1
37.9

stemless unguentarium
resting surface rather rough from wheel; in general,
rather roughly made
dingy buff clay with white and other bits and some
mica; dashes of matt black paint on lip inside and
out, and on body one side
unbroken
H 0.071, diam. 0.042

P 1565
Tomb 9, 2
36.33

bottle jug
flat bottom left rough from wheel; thick band handle
red clay with many white bits; surface lighter color
(wet-smoothed?) mostly gone
lip chipped one side, small hole in body same side
H 0.14 diam. 0.064

P 1566
Tomb 9, 3
37.8

stemless unguentarium
bottom rough from wheel; surface rough
red clay, with white and other bits; surface lighter
color (wet-smoothed?) mostly gone
intact
H 0.06 diam. 0.034

P 1567
Tomb 9, 4
36.29

jug, pinched rim
bottom shows wheel marks, but trim; and slightly ~~xxxxx~~
concave; rather thick band handle
buff clay, with white and other bits; pink bruise one
side; surface lighter color (wet-smoothed?) - much
worn
one side of the trefoil lip broken away, and the handle
has sprung from it at the back; otherwise intact
H 0.193 diam. 0.13

P 1568
Tomb 9, 5
37.10

g main 9, 13 (blue white)
main 43, 24 (body) for color the
no blue

painted jug with shoulder projections and base
flaring rim nearly flat on top; band handle slightly
concave on outside; the shoulder projections are
applied pinches of clay; the under side of the
foot is concave with narrow outer resting surface;
its outer edge is roughly grooved by the wheel,
which has set off also a rough upper stage to the
foot
rather hard red clay with some white bits and a rough
marked somewhat pitted surface; worn places on neck
suggest rest is covered with a red wash; the color,
mostly gone, incl.s traces of a fugitive powdery
blue (on neck, all round and up and down, but
stopping short of the rim; on back of handle; on
upper stage of foot (small trace); and remains of
thin dark paint (a band continuing the upper
handle attachment and interrupting the blue; and
possible wavy lines on the body)
intact
H 0.18 diam. 0.07

- P 1569
Tomb 9,6
37.7
*9.16.47
one each from
Tomb 60, 61
with large shoulder*
- fusiform unguentarium, high shoulder
rim a flare on under side, a convex bevelled surface
on top; foot shows on outside rough spiral from
wheel, and on under side smooth marking from wheel
red clay, crackled buff surface
mended from a great many pieces; bits missing
H 0,142 diam.0.054
- P 1570
Tomb 9,7(body),
21 (neck only)
37.6
*Body a foot, Tomb 61
of neck left in
Pl. LXVII
Pin on other*
- fusiform unguentarium
down-turned rim; under surface of foot swelling at
center
red clay, white and other bits; nicely smoothed
surface, pitted, buff with red bruises; remains of
matt black paint about the stem and foot. mended
from two pieces
H 0.154 diam.0.049
- P 1571
Tomb 9,8
37.43
- stemless fusiform unguentarium
bottom shows spiral from wheel
clay with white and other bits, red with yellow
patches
intact
H 0.072 diam.0.034
- P 1572
Tomb,9,9
37.5
- fusiform unguentarium, high shoulder
rim slightly undercut, a convex bevelled surface on
top; raised line at base of neck; foot shows on
outside rough spiral and on under side smooth flat
marking from wheel
clay with white and other bits, red and yellowish buff
in patches
intact

2 N of Wall A)
42.14

fragmentary pot, "casserole" ware
pot with incurving sides, ledge for lid provided by
short flaring neck which ends in thickened rim;
from the rim, a vertical handle round in section
arches down to the upper part of the body;
interior ridged by wheel, exterior faintly so
red clay with some white bits; thin fabric; surface
blackened especially in one part of inside
mended from many fragments; about a third ~~of~~
preserved
PH 0.165 diam.ca.0.23 (rough estimate)

P 1612
Sherd Lot 17(Tr.43/
75, burnt patch, S of
Wall A at ca. .60
below its top)
40.7, 8

fragment of casserole
bottom offset at base of slightly flaring sides;
projecting, deeply grooved along top (to take
lid?) and with a shallow groove below it inside
red clay with white and other bits, some ~~shiny~~
shiny; partly blackened
large fragment and 3 small joining fragments; less
than a quarter of the whole preserved, but the
profile save center bottom; no handle preserved
PH 0.062 diam.ca.0.23 *Non-joining frags - Sherd Lot 16.*

P 1613
Sherd Lots 19 & 21(Tr.
45 extension, loose
stony fill, and
whitish dromos? fill)
39.16

fragment of pergamene ware
interior of heavy base ring(?) preserved, with
part of flat upper surface of the dish
fine evenly baked whitish buff clay, firm dark red
glaze with moderate luster
fragment mended from 3 pieces
greatest dimension of frg. 0.066 est. diam. of base
ring, inner line, (cannot be taken ~~any~~ with any
closeness)

P 1614
Sherd Lots 19 & 24
(Tr.43 ext. loose stony
fill below ca.2.40, &
fill of lower (cross-
wise) dromos, from
below ca.5.30)

glazed incurving bowl, ring foot
profile seems somewhat earlier than that of P1608
pale greyish buff clay, fine but with fair-sized
bits; remains of matt black paint, which has
dripped down the outside not quite to the ring
foot
mended from 3 pieces; a little over half preserved

iron and wood object
VG.p.46 "Upper line fairly authentic, except it seems to split at left end. Lower line indefinite because of corrosion and consequent disappearance of some of the outline probably in the cleaning". Since removal of some of earth, has broken through at the points indicated. An iron shaft ca.0.004 by 0.003 runs along near the upper line in the drawing. At the middle break, where the wood goes higher, the object as preserved shows an almond-shaped section with the iron about in the middle. Earth removed along the top line shows it distinct and the object having a noticeable curved (up at the broad end, as it lay in the tomb.) Earth removed from "split" place has wood remain in it but no shape emerges. The broad end finishes in a ~~xx~~ short of nail head 1026 up and down, .021 thick; the wood comes down below the iron. The object seems too distinct in some ~~xxx~~ of its outlines to be simply a coffin nail with some of the wood adhering. Possibly a toy(?)

General dimensions, see drawing. T of wood along distinct upper line ca. 0.010

bronze strigil

The scraper welded(?) along its back to an extension of the handle. The handle, like the scraper, made of sheet bronze. The handle strip has been folded out, up, and in again, to make a suitable thickness for grip; a neat turn-back .005 wide all round prevents the edges of the strip from cutting the hand; and gives a solid effect. The extension of the handle follows the curve (longitudinal and lateral) of the scraper, and is decorated along its back by 3 pairs of raised lines, the outer of which form the borders of the part of the extension beyond the ends of the turned-back border. The folded-in end of the handle strip abuts on the beginning of the curved part, with 2 corner points and a central tongue.

The object has been cleaned and waxed, the folded-in end of the handle pressed back into place (cf pre-cleaning photograph), and a central section of the scraper restored in wax; the resulting curve and length are somewhat inaccurate.

bronze mirror case(?) with handle
The side with the handle is flat and
apparently undecorated. The opposite
side slopes to a raised edge and a
center raised nearly as high as the
edge, and is decorated by encircling
raised lines (broad ones bordered by
narrow ones). The curved edge has a
central fillet distinct all round,
but this may be due to springing apart
in corrosion. The handle has no connection
with the bronze of the mirror case.
The bent-back points of its fastening
staples may have held it to a facing
of wood or some other perishable stuff
or possibly, as it is not in the center,
it had no connection with the mirror
case?

The mirror(?) M 272 fits, with margin,
within the raised edge of the case.
The object has not been cleaned except
that the dirt not immediately about
the handle has been removed. Considerable
corrosion, which has destroyed part
of the left side of the handle, which
was undercut in cleaning; note that the
right side of the handle is in position
as found.

- 39.) alabaster vase Pit 48 in deans near n.w. stonem under
(drawing?) undisturbed fill of sand & gravel
- 40.) [coin] Pit 64 str. June 17
(outline)
- 41.) iron object Pit 62 lying on right of man's right shoulder, str.
(no pottery found)
- 42.) lamp frag. of base Type XXVII early example [Pit 64]
- 43.) ^{F.C.} lamp of minor type Pit 64 2.30 below surface in Hall. fill under
1st Roman ground level 30/4/40
- 44.) fragment pt white or VII or possibly early Hall. Pit 64, p. 104, 42
- 45.) " " " Hall. " " 5e
35.13 " " 1e
- 46.) interesting sherd, str. (cont. read) " " 4e
- 47.) again alabaster, broken, found with F 44 " " 4e
- p. 485
47.) broken alabaster and frag. of head of large t.c. statue ear and eyes
Pit 64 p. 103 4e
- 48.) broken glass vase very rounded rim & fragment from body Transparent
only sl. indentation early Roman bottle type Prob. 1st AD
Pit 64 p. 133, 2
- p. 485
49.) frag. t.c. lamp Type XXII <no statement of finding place>

p. 506 -

- 1.) silver bell w. handle broken off, clapper still attached
(outline - round) <diam. .02> Pit 82 surface soil 7/4/41
- 2.) bead of gold necklace with 1
- 3.) coin R
(outline) Pit 87 - surface soil
- 4.) " "
(outline) Pit 80 stratum 4 p. 521 8/4/41
- 5.) bronze object shaped like open umbrella <stud>
(outline) ca. .025 across
Pit 87 2nd stratum
- 6.) similar, broken, without knob on center of cross side with 5
(outline)
- 7.) coin R Pit 87 2nd stratum 10/4/41
(outline)
- 8.) coin R 217-218 Pit 87 2nd stratum near 7 10/4/41
(outline)
- 9.) coin R " " " " 14/4/41
- 10.) red Hellenistic heavy base ring ware - base brown finely silted clay
extensive red paint some mica 2 pieces 26/4/41
<no statement binding plan>

p. 632 -

- 11.) 2 very heavy black glazed ^{gray} ware "HAT E" (same bowl) attic Pit 73 p. 549-607-Sa
under wall n.e. corner of shop etc. etc.
- 12.) Hell. lamp... Type XIX <Pit 73?> p. 641, 7 <remains 5 or 6 on level of top of
filler down>
27.18

McF F(inds) at St Homogenus 1941-2

P. 632-

* 13.) 2 pots 1 fus. fragment and the other a black ^{only inside} ^{potter} nearly complete
Pit 95 p. 605-3 etc.

14.) coin G Pit 73 (earth removed - intrusion?)
(outline)

15.) coin R " " " "
(outline)

16.) coin w. fine gold leaf French 92, dump
(outline)

save? 17.) [coin] R Pit 73 west, in fallen stuff below rock level of
(outline) roof + just 1 meter, to east of sarcophagos west. 90
14/5/41

save? 18.) bronze ring near F17 14/5/41

save? 19.) ^{by} bell as F17, 18
(outline)
ca. 0.15 across

save? 20.) 2 bones + 1 glass bead found in earth removed to be sieved from same
place as 17, 18, 19

save? 21.) (bones, from sarcophagos?)

save? 22.) lamp XXVII? Pit 73 west over tomb found in fallen stratum
under sarcophagos 130 cm below upper level
of rock that formed roof 16/5/41

save? 23.) gold ear ring w. stone found 1 cm south of lamp #22 in same fallen
stratum under sarcophagos 130 cm below rock
Both 22-23 found among bones which []
suggested likelihood of their having come from the
sarcophagos

24.)

p. 682 -

- 24.) 2 gold earrings w. 3 bz. fragments found all together same level 164cm
 31.5
 35.31 bitten out
 without bz frags. below top of rock level ... Pit 73 - west
 prob. from sarcoph. ... near F25, coin F
- 25.) coin R 337-340 AD Pit 73 - west fallen structure same as
 (outline) F23 + 24 lying directly on chunk of fallen claustra
 roof 158 below upper level of rock
- 26.) ear ring Pit 73 west near 24 + 25 among bones - piece of glass
 35.32
- 27.) {bone} fragment for same place as 26
 35.33
- 28.) frag. glass w. 27 + 28 among bones
- 29.) {bone} frag. same area as 27-29
- 30.) glass vase, broken Pit 73 w, south side over fallen roof near wall
 of tomb 21/V/41
- 31.) large grooved base of green stone found in earth from same stratum as
 31.9 w. accompanying F 30 - nearby 21/V/41
 hint of gold
 35.35 bitten, but without gold
- 32.) (bone, large bone) Same place as F 30 21/V/41
- 33.) glass, large base of frags. " " " "
- 34.) shreds from same place as " " " "
- 35.) coin as 30-34 over fallen roof of tomb
 (outline - small)
- 36.) coin R [Pit 73] p. 729 - 2a
 (outline - large)
- 37.) coin, silver 195-211 AD Pit 73 south in second stratum among stone debris
