Henry:

A, B, C, above are 1937, correctly catalogued in Field
Book. A + B have been checked against sketches
of 2 or 3 shreds in each group, which correspond.

C - was supposed to be only a restored towel; but two
extra shreds (L-88-111) doubtless came from same
place but didn't fit.

To clean up the mess I have changed the Operation to
SE-13X. The X should be added to the shreds & the
restored vessel. There ought to be 10 of L-88-109 in the two
trays - I found 9 of them without completing the search.
Try to find the 10th. When this is removed, all shreds
in the trays are 1939; and they can remain as
Field Cat No. SE-13-1 to 26.

Note: There are more L-88-110 shreds than field study sheets
in Catalogue call for - but this is doubtless due to
subsequent leakage of the bag of heavy shreds.

NB The "X" should be added to Cat. cards in Miss Bruckner's
office + elsewhere, with her permission.
